Abstract:

Learn Together is a children's learning application targeted towards children from the age groups of 3-5. Learn Together covers a plethora of topics. This android application includes subjects ranging from English to Mathematics to teaching children basic manners, habits and expanding their imagination with stories.

Learn Together consists of six modules. First module is English, which covers Alphabets, opposites, community helpers and action words. In alphabets, the user can learn the pronunciation of the alphabets by clicking on the letter. Math is the second module which consists of numbers from one to twenty, simple addition and subtraction sums. A user can learn the pronunciation of numbers by clicking on the number. Third module of the application is EVS, where the user can learn about seasons, shapes, fruits, etc. Fourth module entails etiquettes where the user can learn good manners, habits and prayers. Fifth module is Rhymes and stories the user can listen to and rhymes they can sing along too.

Since this is a children's learning application, it includes a colourful and interactive UI which is also child friendly.
